

IMPORTANT NOTE

The FLAPP wall is very light and has a large area exposed to wind.

DON'T USE FLAPP OUTDOORS UNLESS IT IS ADEQUATELY PROTECTED AGAINST WIND!

IN THE EVENT OF STRONG WINDS OR STORMS, PLEASE REMOVE DECORATION AND IMMEDIATELY FOLD THE FLAPP WALL.

The supplied weight bag for attachment on the back is not sufficient for this and only suitable for indoor applications!

Remember, in the worst case a gust of wind is enough!
Therefore, please secure the FLAPP wall sufficiently before opening it!

We offer the following solutions for stand safety:

1. Weight box set

2. Weight plate set

3. Lash set

4. Soil anchor set

5. Crossbar holder for fixation
in the event tent
